

## Requirements for StranDNA Approved resellers/installers.

All approved reseller / installers must maintain Membership to their chosen Locksmiths or Trade Association and are responsible for maintaining a current CRB disclosure and Public liability insurance a copy of which must be sent to StranDNA (UK) Ltd for their records. StranDNA (UK) Ltd must be notified if there are any changes to the above as it may affect your approved reseller/ installer status.

All StranDNA Approved Installers will agree to hold a minimum stock of 2 (two) Chain Reaction DNA Alarms each.

1 x Brass

1 x Chrome

It is suggested these should be carried secure in your service vehicles so an opportunity for you to supply a Chain Reaction Alarm whilst at a clients premises is not missed. If in the event of StranDNA UK Ltd securing a sales opportunity in your area, we will pass the lead onto you for you to profit from the sale of the alarm.

Due to the DNA component in the alarm, Only installers who are registered with StranDNA UK Ltd, have undertaken product training and hold a current I.D Number issued by StranDNA UK Ltd can supply and install this device.

Therefore you will agree not to re-sell these devices to any other trade party as the DNA code will be registered to your name until it is installed and then reregistered to the purchaser / home owner.

Another approved installer may carry out an installation on your behalf but they must still register the DNA code with us as part of their installation procedure.

If a DNA Alarm is either lost or stolen you must inform StranDNA Registrations dept immediately on 08442 490140.

We would advise that you either purchase a Demonstration Case or purchase some *Chain Reaction Alarm only* kits to demonstrate the device to prospective clients as the Chain Reaction DNA versions are delivered security sealed and **MUST NOT** be opened prior to installation.

Demonstration Cases and Chain Reaction Alarm Only kits (Non DNA) will be available for purchase from the trade section of the web site, from our distributors or by calling StranDNA UK Ltd.

There is no minimum stock requirement for the Chain Reaction Alarm Only kits (Non DNA) and these do not require registration with StranDNA UK Ltd.

### NOTE:

Any customer information obtained through the course of your work whilst installing a Chain Reaction DNA Alarm is confidential and should be treated as such. Any customer information pertaining to DNA codes or addresses, locations, specific applications or where these alarms are installed is confidential and the disclosure of any such information to unauthorised 3<sup>rd</sup> parties will constitute a breach of contract and could result in legal action.

If you have any doubts about these procedures please check first with StranDNA UK Ltd Service Dept on 08442 490140.

**I understand and agree to these conditions and now apply to become a StranDNA approved installer.**
